**INSTRUCTIONS:**

Answer question one and any other two

1. (a) What is project planning? (3 marks)
- (b) What is project management? (3 marks)
- (c) Drawing from the writings of Duncan Haughey, clearly justify the stance that project planning is a process. Illustrate their utility in the field of forensics. (24 marks)
2. (a) What do you understand from the term project cycle? Give the importance of the three aspects it seeks to control in forensics. (10 marks)
- (b) Give the key aspects of management that a project planner should focus his/her attention on. (10 marks)
3. (a) What do you understand by the term needs analysis. (4 marks)
- (b) Explain the needs analyses according to Bradshaw's classification. Give a clear elaboration why they are important. (16 marks)
4. (a) Clearly outline the duties of a project manager in term of the roles that are expected of them. (4 marks)
- (b) What are some of the potential challenges that project managers face that could compromise the final realization of their final end-goal? Give an elaboration of these challenges using illustrations. (8 marks)

- (c) What strategies would propose to project managers to mitigate the effects of the challenges? (8 marks)

5. Define the following terms in line with planning and management

- (a) Monitoring (10 marks)

- (b) Evaluation (10 marks)
-
