#### EXAMINATION FOR THE AWARD DEGREE OF BACHELOR OF COMMERCE

### BCOM 366: STATISTICAL QUALITY CONTROL

### **STREAMS:**

TIME: 2 HOURS

11.30 A.M - 1.30 P.M.

### DAY/DATE: THURSDAY 9/04/2020

### INSTRUCTIONS

1. Answer questions **ONE** and any other **TWO**.

### **QUESTION ONE**

- (a) In addition to being critical element in operations, quality has other implications. Discuss this statement and highlight importance of quality to a firm. [8 Marks]
- (b) Explain role of inspection in statistical quality control. [4 Marks]
- (c) 20 Television sets were examined for quality control test. The number of defects for each television set are recorded belw: 2, 4, 3, 1, 1, 2, 5, 3, 6, 7, 3, 1, 4, 2, 1, 3, 4, 6, 1, 1.

#### Required:

i)	Prepare C- chart	[8 Marks]
ii)	What conclusion can you draw from it?	[2 Marks]
(d) Dis	scuss variations that may affect the quality of a product.	[4 Marks]

(e) Discuss ways in which quality of a product may be controlled in a manufacturing plant.

[4 Marks]

(a) Discuss three types of acceptance sampling plans that are commonly used for quality

Page 2 of 4

## **QUESTION TWO:**

(	a)	Discuss role of acce	ptance sampling	g in qual	ity control.	[	[4 Marks]	
•	/							

(b) A certain food company puts Mango juice cans advertised as containing 200grams of juice. The weights of the juice drained from cans immediately after filling for 20 samples are taken by a random method. Each sample includes 4 cans. The samples are tabulated in the following table. The weights in the table are given in units of grams in excess of 200gms.

Required (i) Construct an chart to control the weights of Mango juice for the filling.

[10 Marks]

Sample number	Weight of each can (4 cans in each sample n=4)			
		Х		
1	15	12	13	20
2	10	8	8	14
3	8	15	17	10
4	12	17	11	12
5	18	13	15	4
6	20	16	14	20
7	15	19	23	17
8	13	23	14	16
9	9	8	18	5
10	6	10	24	20
11	5	12	20	15
12	3	15	18	18
13	6	18	12	10
14	12	9	15	18
15	15	15	6	16
16	18	17	8	15
17	13	16	5	4
18	10	20	8	10
19	5	15	10	12
20	6	14	12	14

# iii) Comment on the quality standards of this firm.

[2 Marks]

[4 Marks]

(b) Explain two advantages of double sampling plan.

(c) Discuss two factors to consider when setting up control limits.

**QUESTION THREE** 

control.

[4 Marks]

[6 Marks]

(c) Required: Determine the upper and lower and control chart limits. [4 Marks]

(d) ABC is a producer of decaffeinated coffee, bottles NF. Each bottle should have a net weight of 4 ounces. Te machine that fills the bottles with coffee is new, and the operations manager wants to make sure its properly adjusted. He randomly selects and weighs n= 8 bottles and records the average and range in ounces for each sample. The data for several samples is given in the table below.

Sample	Sample Range	Sample Average
А	0.41	4.00
В	0.55	4.16
С	0.44	3.99
D	0.48	4.00
E	0.56	4.17
F	0.62	3.93
G	0.54	3.98
Н	0.44	4.01

Required: Determine if the machine is properly adjusted and in control. [6 Marks]

### **QUESTION FOUR**

(a) Discu	ass managerial issues in relation to use of control charts.	[6 Marks]
(b) A rar	dom sample of 200 was taken from daily production of large o	utput of pens and number
of de	fective pens was noted. On the basis of information given belo	w;
(i)	Prepare a control chart for fraction defective.	[10 Marks]
(ii)	What conclusion do you draw from the control chart?	[2 Marks)

Production each day	No of defectives	Production Each day	No of defectives
1	10	8	4
2	5	9	12
3	10	10	24
4	12	11	21
5	11	12	15
6	9	13	8
7	22	14	14

Production each day	No of defectives	production each day	No of defectives
15	4	22	9
16	10	23	11
17	12	24	12
18	11		
19	26		
20	13		
21	10		

(i) Explain the following terms as used in statistical process control.

(ii)	Acceptable Quality level (AQL)	[2 Marks]
(iii)	Lot tolerance percent defective (LTPD)	[2 Marks]
